

TUTORIAL HOSTING

NAMA : NADYA FRANSISKA MANURUNG

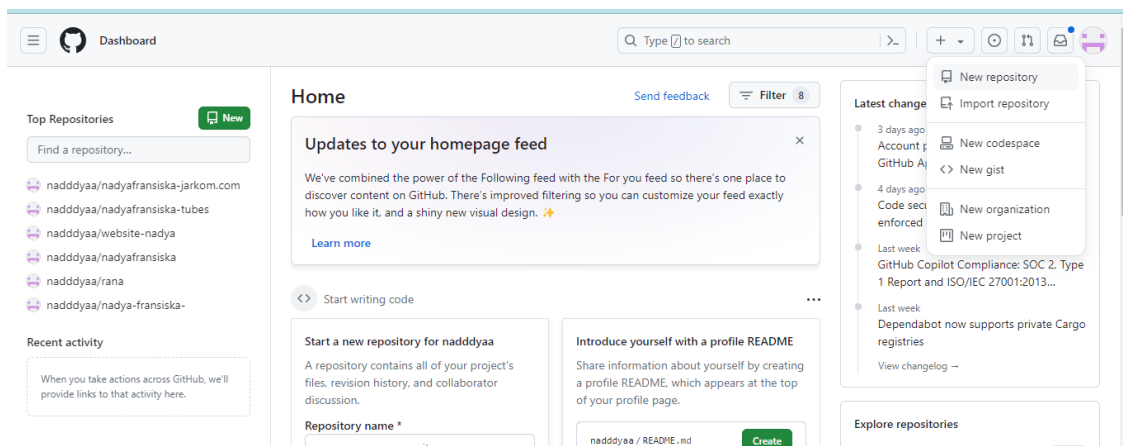

NIM : 607012330123

KELAS : D3SI-47-05

MATA KULIAH : ARSITEKTUR JARINGAN & KOMPUTER

LANGKAH LANGKAH HOSTING :

1. Masuk ke akun GitHub Anda atau buat akun baru di github.com. Lalu buat repository baru dengan mengklik tombol New atau Create a new repository.

2. Setelah itu beri nama repository.

3. Setelah itu klik create repository.

Anyone on the internet can see this repository. You choose who can commit.

☐ **Private**
You choose who can see and commit to this repository.

Initialize this repository with:

☐ **Add a README file**
This is where you can write a long description for your project. [Learn more about READMEs.](#)

Add .gitignore
.gitignore template: **None** ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files.](#)

Choose a license
License: **None** ▾

A license tells others what they can and can't do with your code. [Learn more about licenses.](#)

☐ You are creating a public repository in your personal account.

Create repository

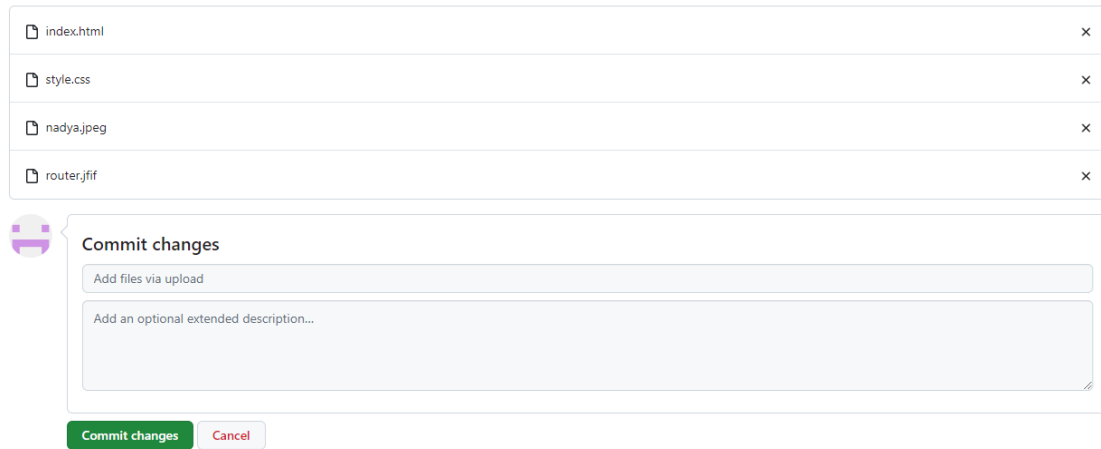

4. Setelah repository dibuat, unggah file HTML, CSS, dan image ke repository.

The screenshot shows the GitHub repository page for 'nadyafransiska-tubes-arsijarkom'. The repository is public. The page includes a search bar, navigation tabs (Code, Issues, Pull requests, Actions, Projects, Wiki, Security, Insights, Settings), and repository statistics (Pin, Unwatch, Fork, Star). Below the repository name, there are two cards: 'Set up GitHub Copilot' and 'Add collaborators to this repository'. A 'Quick setup' section provides instructions for cloning the repository using HTTPS or SSH, with the URL 'https://github.com/naddyaa/nadyafransiska-tubes-arsijarkom.git'. It also includes a command-line setup for creating a new repository. A watermark 'Activate Windows' is visible in the bottom right corner.

5. Kemudian pilih “choose your files”

The screenshot shows the 'Drag files here to add them to your repository' section of the GitHub repository page. The text 'Drag files here to add them to your repository' is centered, with a link 'Or choose your files' below it. Below this section, there is a 'Commit changes' section with a text input field for 'Add files via upload' and a text input field for 'Add an optional extended description...'. A watermark 'Activate Windows' is visible in the bottom right corner.

6. Lalu masukkan file html,css, dan image kemudian commit changes.

index.html

style.css

nadya.jpeg

router.jfif

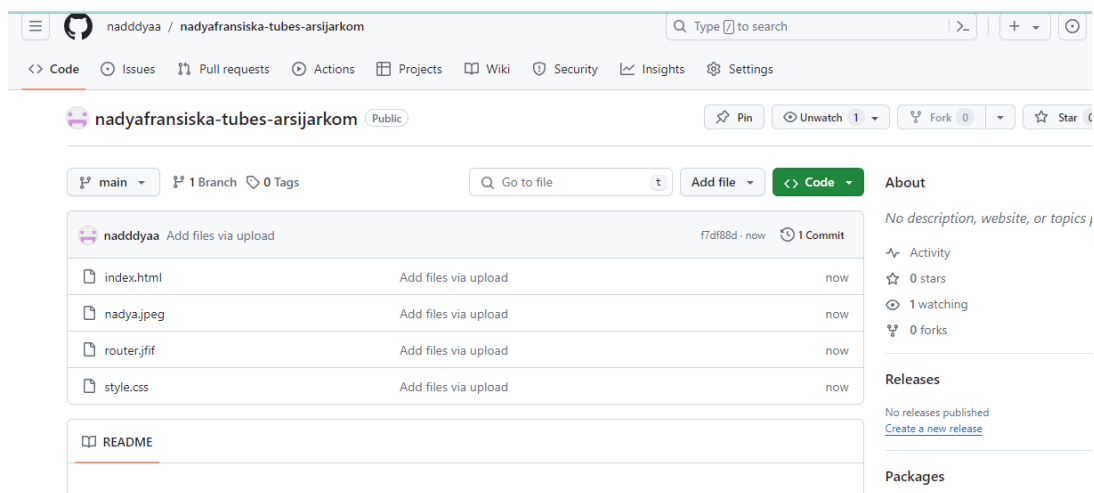

Commit changes

Add files via upload

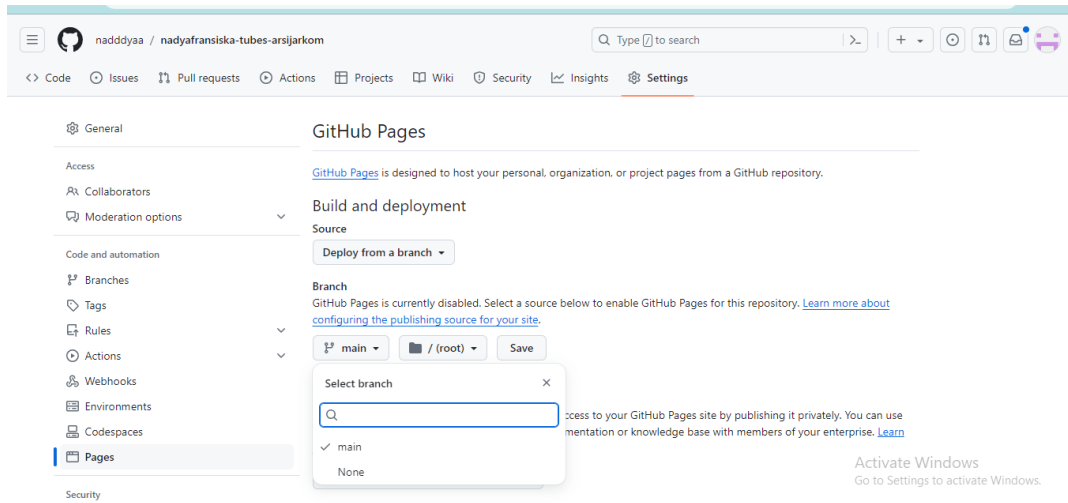

Add an optional extended description...

Commit changes Cancel

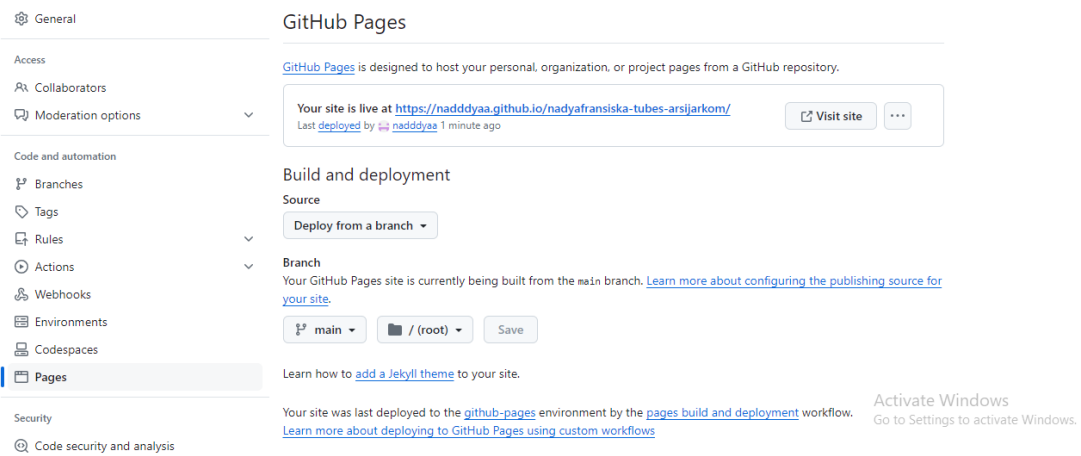

7. Setelah filenya di upload akan seperti ini.

8. Klik tab Settings. Di bagian kiri, klik Pages. Di bagian Source, pilih branch yang ingin Anda gunakan (main) dan klik Save.

9. Setelah beberapa saat, situs web akan tersedia.
